Civil Siteworks Done Right

We understand that the road to success starts with thorough, upfront planning, which is why we bring in the right people to ensure your project gets off on the right foot. Our qualified and competent team can see you through any civil siteworks project, from subdivisions and carparks, through to drainage.

Our full civil siteworks capabilities

Subdivisions

We have the right equipment to carry out all your residential and industrial subdivision requirements. Our 3D machine control technology is fitted to our excavators, graders, scrapers and tractor blades, ensuring a high level of accuracy with line and level. As part of this service, we also have experienced in-house drainlayers for all sewer and stormwater installation.

Foundations and Site Preparation

With the increase in residential and commercial developments in the Canterbury region, we have become well known for our quality foundations and site preparation. Our capabilities include excavating and filling residential and industrial sites. We offer a complete service with our clean hard fill dumping facilities and aggregate supply from our fully operational quarry.

Driveways, Carparks and Pavements

Our team knows how to get the excavation, preparation and surfacing of driveways, carparks, and industrial pavements Done Right. We are capable of delivering on projects of any size from small driveways to large industrial pavement areas. We have the right team and equipment to complete your project to a high standard, on time and on budget.

Demolition and Site Clearing

Whether it's a house or a commercial building, our team has the skills, equipment and expertise to carry out the demolition of any small to medium-sized buildings. In combination with our other business services, including clean hardfill dumping, land clearing, tree removal and greenwaste disposal, we offer a complete demolition and site clearing service. We take demolition projects seriously and ensure qualified asbestos removal experts assess all projects.

Drainage

Experiencing surface water issues? Our siteworks team offer a range of drainage solutions to eliminate or deal with any surface water issues. Whether you require the installation of soak holes, sumps or kerb and channel we have the know-how and resources to get your drainage Done Right.

Service Installation and Connections

As an approved contractor for the Ashburton, Timaru and Selwyn District Councils, we take care of all your service installation and connection needs. Our team is competent in supplying and installing all-new sewer systems, potable water and stormwater connections to your property.

Entranceways and Shoulder Widening

Require an entranceway or shoulder widening? As an approved contractor for Ashburton District Council, our team is authorised to carry out your entranceway or shoulder widening requirements. Whether it's for a new or existing property, we liaise with all required parties to ensure the job's Done Right.

Concrete Pouring and Formation

Whether it's 10 square metres or 4,500 square metres, our siteworks team know how to get your concrete and formation projects Done Right. Our team takes care of the full process including preparation, liaising with suppliers, pouring, forming and finishing. Our specialised equipment includes a remote-controlled concrete laser screed allowing efficient and precise levels of any large concrete pads.

Landscaping

As part of delivering complete solutions, our landscaping services provide the final detail to any project. They include the preparation and construction of lawns and gardens along with planting trees and vegetation, developing stormwater swales, sowing grass seed and installing irrigation and drip lines.

Why work with us

Done Right for decades

Established in 1990, we've worked hard to become one of the most trusted and experienced contractors in the region. People choose us for our reputation for doing a good honest job - every project, every time. It's something we're immensely proud of and do everything to uphold.

Investing in what matters

We keep up with the play by investing in the latest equipment and technology, along with ensuring our processes are up to date. Investing in what matters means projects are delivered as efficiently and accurately as possible.

First-class fleet and facilities

Our investment in a first-class fleet and facilities reinforces our dedication to quality. Our fit-for-purpose workshop and office facilities also provide the foundations for our team to successfully deliver projects to a high standard.

Everybody safe, every day

The health and safety of our team, our clients, our suppliers, and the general public is our top priority every single day. We are continuously reviewing and improving our systems, processes and procedures to ensure every person, every project, and every plant is safe all day, every day. We are proud to hold a SiteWise Green accreditation.

Who we've worked with

We've completed a wide range of agricultural, residential and commercial projects across the South Island, and we are privileged to have worked alongside some of our clients for over 30 years. The processes we have developed, our investment in people and equipment, and our Done Right attitude has seen us selected as the contracting partner of choice for some of New Zealand's most well-known brands.
